## Profile

---

MEAN Stack Developer with hands-on experience building scalable web applications using Angular, Node.js, Express.js, and MongoDB. Strong understanding of REST APIs, JWT authentication, role-based access control, and full-stack architecture. Passionate about problem-solving, clean code practices, and delivering user-friendly solutions.

Experienced in developing dynamic single-page applications using Angular, implementing modular architecture, reusable components, and efficient state management. Quick learner with the ability to adapt to new technologies and contribute effectively within collaborative team environments.

## Education

---

### Bachelor of Computer Applications (BCA)

2021 – 2025

Mercy College Palakkad (University of Calicut)

CGPA: 6.68/10

## Experience

---

### Luminar Technolab – MEAN Stack Intern

July 2025 – Present

- Built end-to-end MEAN applications with responsive interfaces using Angular and Bootstrap.
- Designed and integrated RESTful APIs with secure JWT-based authentication and role-based authorization.
- Structured MongoDB schemas, executed CRUD operations, and optimized database queries for performance.
- Developed reusable Angular components, services, and routing modules.
- Contributed throughout the development lifecycle and deployed applications using Git and Render.

## Projects

---

### CakeShopp – Online Cake Ordering Application

- Developed a responsive cake ordering web application using Angular and Bootstrap.
- Implemented product listing, cart management, and order placement features.
- Integrated JSON Server to simulate backend APIs and handle CRUD operations.
- Applied Angular routing, services, and component-based architecture.
- Tech: Angular, Bootstrap, JSON Server, TypeScript

### EMI Calculator – Loan Calculation Application

- Built a dynamic EMI calculator using Angular with real-time calculation features.
- Implemented form validation and two-way data binding for accurate user input handling.
- Designed responsive UI using Bootstrap for better user experience.
- Utilized Angular components and services for modular structure.
- Tech: Angular, TypeScript, Bootstrap

## Technical Skills

---

**Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, Angular, Bootstrap

**Backend:** Node.js, Express.js, REST APIs, JWT

**Database:** MongoDB, Mongoose, JSON Server

**Tools & Deployment:** Git, GitHub, Postman, Render, Netlify

**Soft Skills:** Problem-Solving, Debugging, Team Collaboration, Communication
